K&M Sheet Metal is a full-service manufacturing and distribution facility servicing our local community and the entire United States. We offer a wide variety of products ranging from complete drainage systems, metal roofing panels, hangers, and raw materials to dormers, collector boxes, finials, chimney caps, curved, tapered and radius panels, and complete custom work.

We are often contacted by other manufacturers and distributors to complete difficult, rare, or unique jobs and requests. We work with a wide variety of metals including Copper, Zinc, TCS, LCC, Aluminum, Stainless Steel, Kynar, Galvalume, and more.

There really isn't any sheet-metal job that we can't do.

K&M: Redefining Sheet Metal.

People often ask us what we mean when we say that we are 'Redefining Sheet Metal'. Obviously we can't redefine the physical nature of sheet metal itself, but what we are doing is redefining the quality of sheet metal products, redefining the interaction between the customer and the manufacturer, and redefining the business expectations of the entire sheet metal industry.

We've taken great strides in bringing an age-old industry to the cutting edge of today's technology and customer service. We've streamlined the entire sheet metal process from raw materials to the high end finished products we deliver to our clients. We've made getting exactly what you need both easy and cost-effective. We've put in place a team of knowledgeable sales staff and customer service representatives to see your project through from start to finish. At K&M, we take pride in our work. We want to create relationships with customers who are proud to recommend us and use our products. We take quality seriously and we do our best to make it affordable. As a distributor and a manufacturer, we have a great deal of control over our costs so we can help our customers be profitable. We understand that making your business a success is the best way to make K&M Sheet Metal successful.

K&M is a Women Owned Company and an Equal Opportunity Employer:

Like any successful business, our employees are the backbone of our company. We have a full manufacturing and warehouse unit, sales and customer service staff, operations and shipping department, and company management staff. We strive to maintain a strong working environment and long company tenures.

Call, click, or come by and find out how K&M Sheet Metal can help your business.

Thank you ...

The Team at K&M Sheet Metal

Downspout Cleanouts & Rain Chains

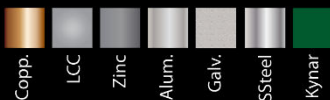

Redefining Sheet Metal

Cleanouts provide an easy way to keep your downspouts and in-ground leaders clean. The door can also be used as a diverter for a rain collector system. Cleanouts are tapered to allow for an easy installation on any of K&M's standard downspout pipe and are available up to 20oz copper, .040 Alum. or 24G Kynar Steel.

Redefining Sheet Metal

Metal Roof & Wall Panels

knows metal roofing. We offer four traditional panel systems: Mechanical Lock (Double Lock), Snap Lock, Nail Strip, and U-Panels. Each System has an available stiffening rib option to strengthen the panel and help prevent oil canning. We offer our panels in a variety of widths up to 27" and lengths up to 40 feet. K&M Sheet Metal also offers curved panels, tapered or straight panels. UL & ASTM certifications are available upon request. Please do not hesitate to contact us. We are happy to help you find the right system for your needs.

Nail Strip & Snap Lock Panel

Redefining Sheet Metal

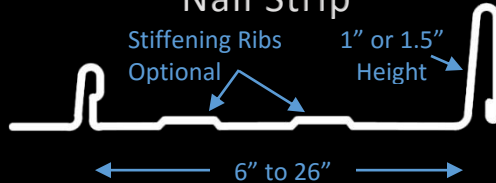

The Nail Strip Lock system is offered in 1" and 1.5" high seams. This system snaps together just like a Snap Lock system and has a hidden built-in nail strip that eliminates the need for cleats

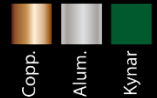

This is an economical system,
Ideal for short runs where
expansion and contraction
are not a factor

Nail Strip

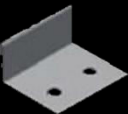

The Snap Lock seam is offered in 1" and 1.5" high seams. This system snaps together as the panels are installed. Snap Lock eliminates the need to mechanically lock the seams together allowing for faster installation. Snap Lock also incorporates fixed or expansion cleats that allow the panel to expand and contract.

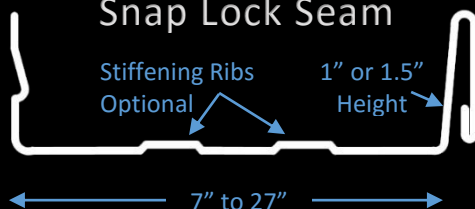

Snap Lock
Clips

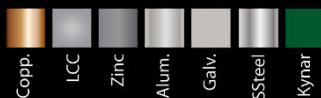

Economy Snap
Lock Clips

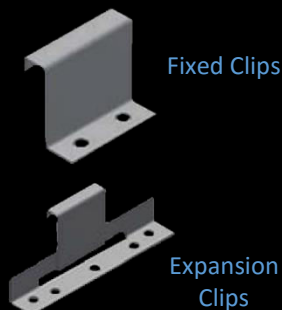

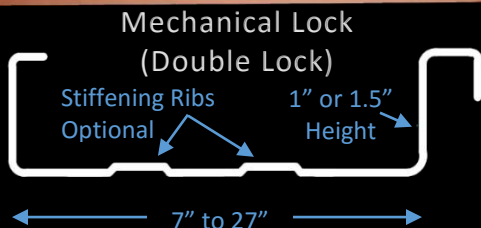

Snap Lock Seam

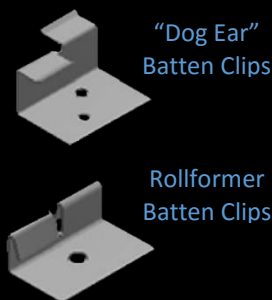

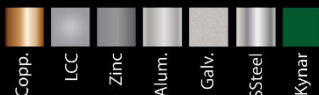

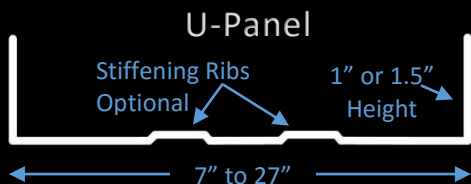

Mechanical Lock & U-Panel

The Traditional Mechanical Lock or Double Lock seam comes in 1" or 1.5" high standing seam. The double lock has long been considered the best locking system available. Hidden fixed cleats or expansion cleats are used to fasten the system to the roof deck to allow the panels to expand and contract.

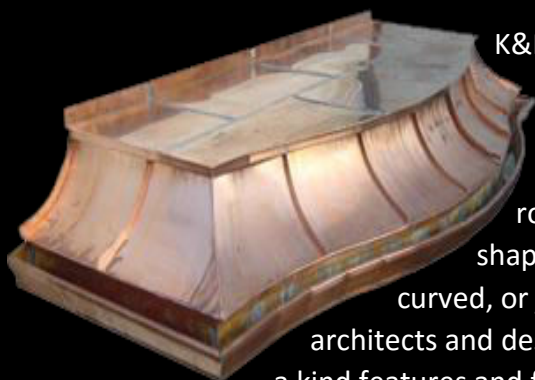

The U-Panel is offered in 1" or 1.5" seam heights. U-Panels can be used in conjunction with heavy-duty batten cleats to form Batten Lock Panels. Batten Cleats are installed between Each panel. A batten cap is then Snapped into place over the cleat. This eliminates the need for Installing wood battens.

Curved Metal Panels

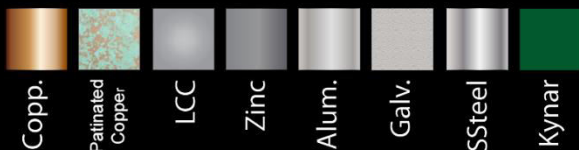

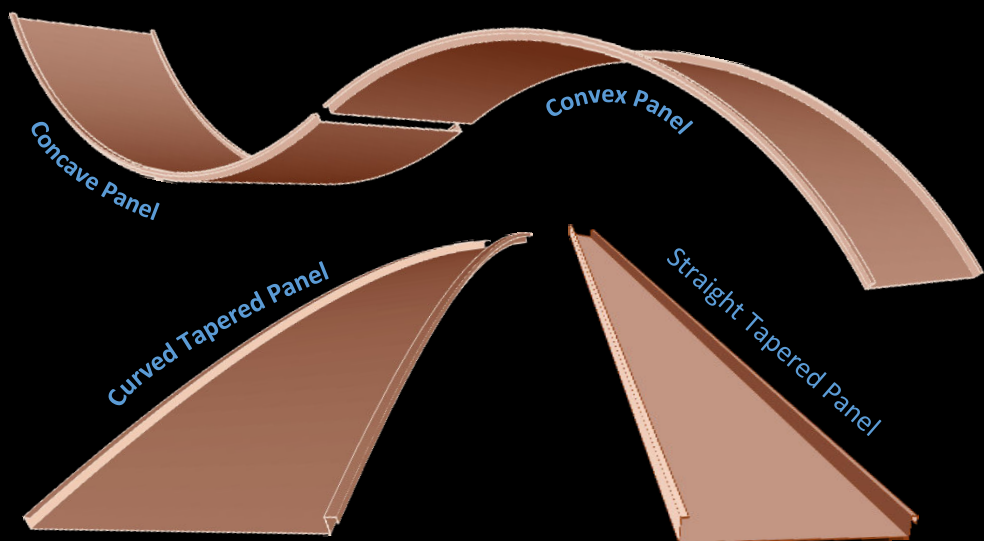

Redefining Sheet Metal

K&M Sheet Metal produces 2 Panel Systems that can be radiused to almost every curve, Mechanical Lock and U-Panel. From barrel roofs, domes, dormers to conical shapes, our straight curved, tapered curved, or just tapered metal panels offer architects and designers the ability to add one of a kind features and function to any project.

Minimum Radii for Mechanical Lock & U-Panel

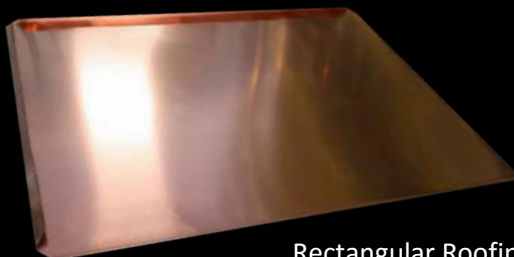

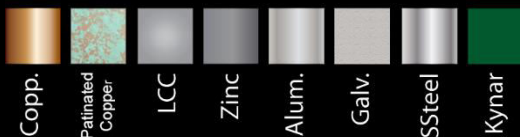

Profile	Copper	Steel	Aluminum
1"	12"	30"	12"
1.5"	18"	50"	18"

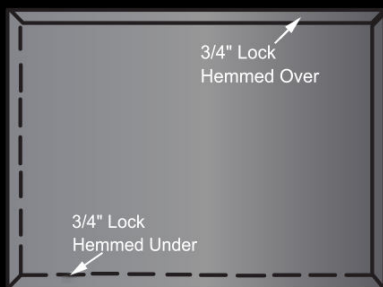

Flat-Lock Metal Wall Panels

Flat-Lock Roofing or Wall Panels

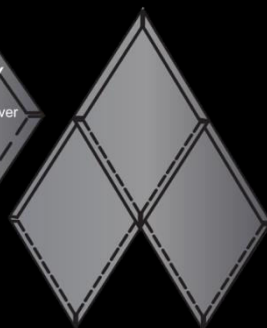

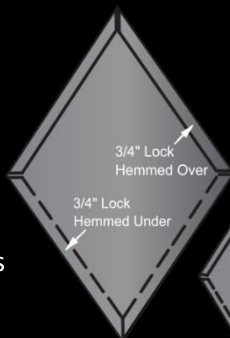

Standard Sizes are based on type of Material and available material format

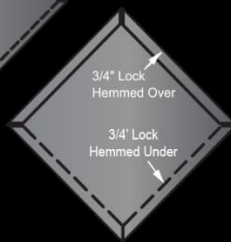

Rectangular Roofing or Wall Panels

Diamond Wall Panels

Square Wall Panels

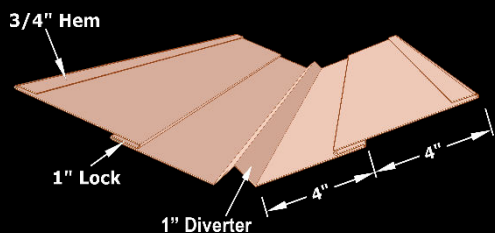

Flat-Lock roofing panels come in a variety of shapes, sizes and metals. These panels are ideal for flat roofs, domes, turrets and any wall panel system – interior or exterior. Metal clips and nails for fastening the panels are available. Pre-Tinning of edges is also available.

Metal Cornice

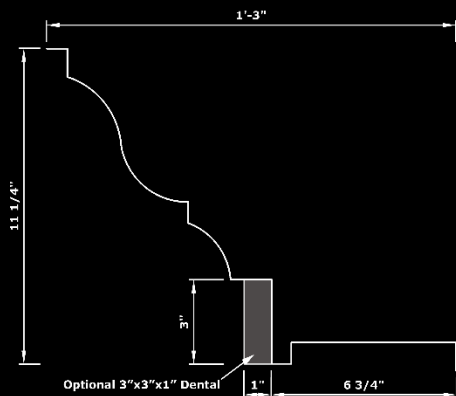

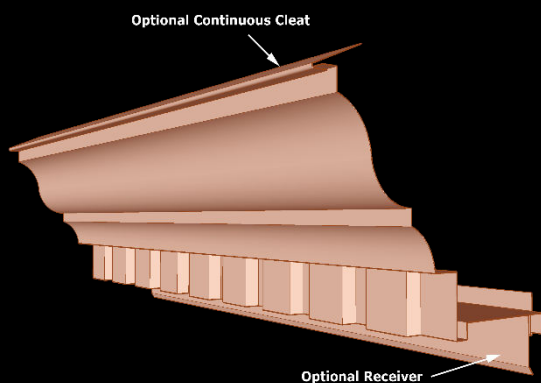

Redefining Sheet Metal

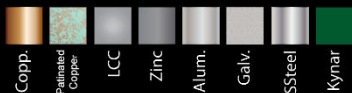

Metal cornice can provide beauty and function to a building. K&M Sheet Metal combines tradition with cutting edge expertise and state of the art technology to design, and fabricate custom cornices to your projects specifications. Our Craftsmen have the ability to match any cornice design and have reproduced cornices for many historic buildings including Universities, Churches and Government buildings. Feel free to design your own or send a sample and/or a detailed drawing of an existing cornice you would like to match. Consider using metal cornice on your next project. Metal cornice offers many advantages over wood such as no maintenance, ease of installation, consistency and material cost.

Northern Cornice

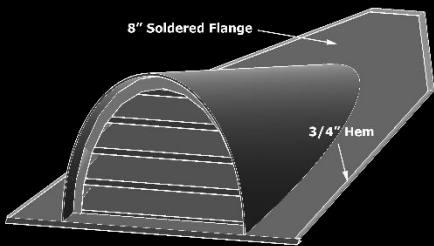

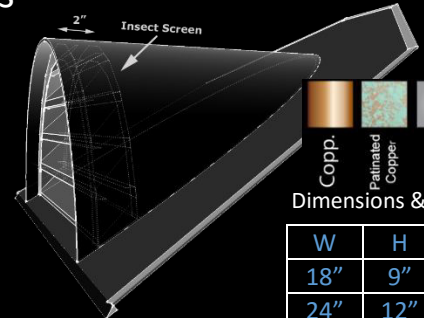

The Northern Cornice is only a small sample of the many designs K&M Sheet metal offer. We can fabricate cornice in sections up to 20' long and up to 24oz copper, .060 Aluminum and 22 Gauge Steel. We also can provide everything you need to install our cornice. Clips, Screws, Nails, Pop Rivets, Butt-Plates, "S" Lock Receivers and Pre-Fabricated inside or outside any degree miters.

Conductor Heads

Redefining Sheet Metal

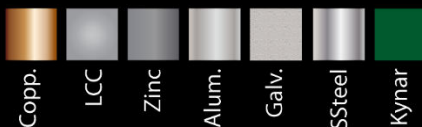

K&M Sheet Metal can make and match just about any conductor head in any metal. Along with offering historic reproductions we also have a large selection of conductor heads for you to choose from to fit your projects needs and budget. Conductor heads enhance the beauty and architectural style on a building. They are traditionally installed under the soffit to let air into the line which then prevents excess noise (gurgling) and helps stop vacuum lock. They are also used for through wall scuppers, roof drains and under valleys where there is a large amount of water that could overshoot or backup standard gutters.
